itracHEALTH Overview

An all-in-one solution for chronic care management at home.

CHRONIC CARE AT HOME

5

CONNECTED
SYSTEMS

24/7

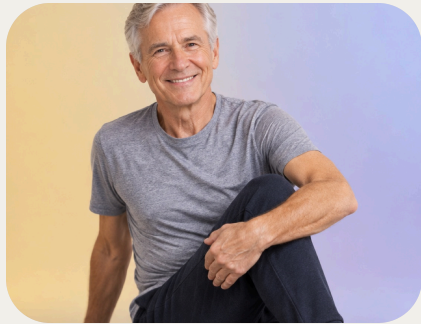

SUPPORT
AT HOME

50+

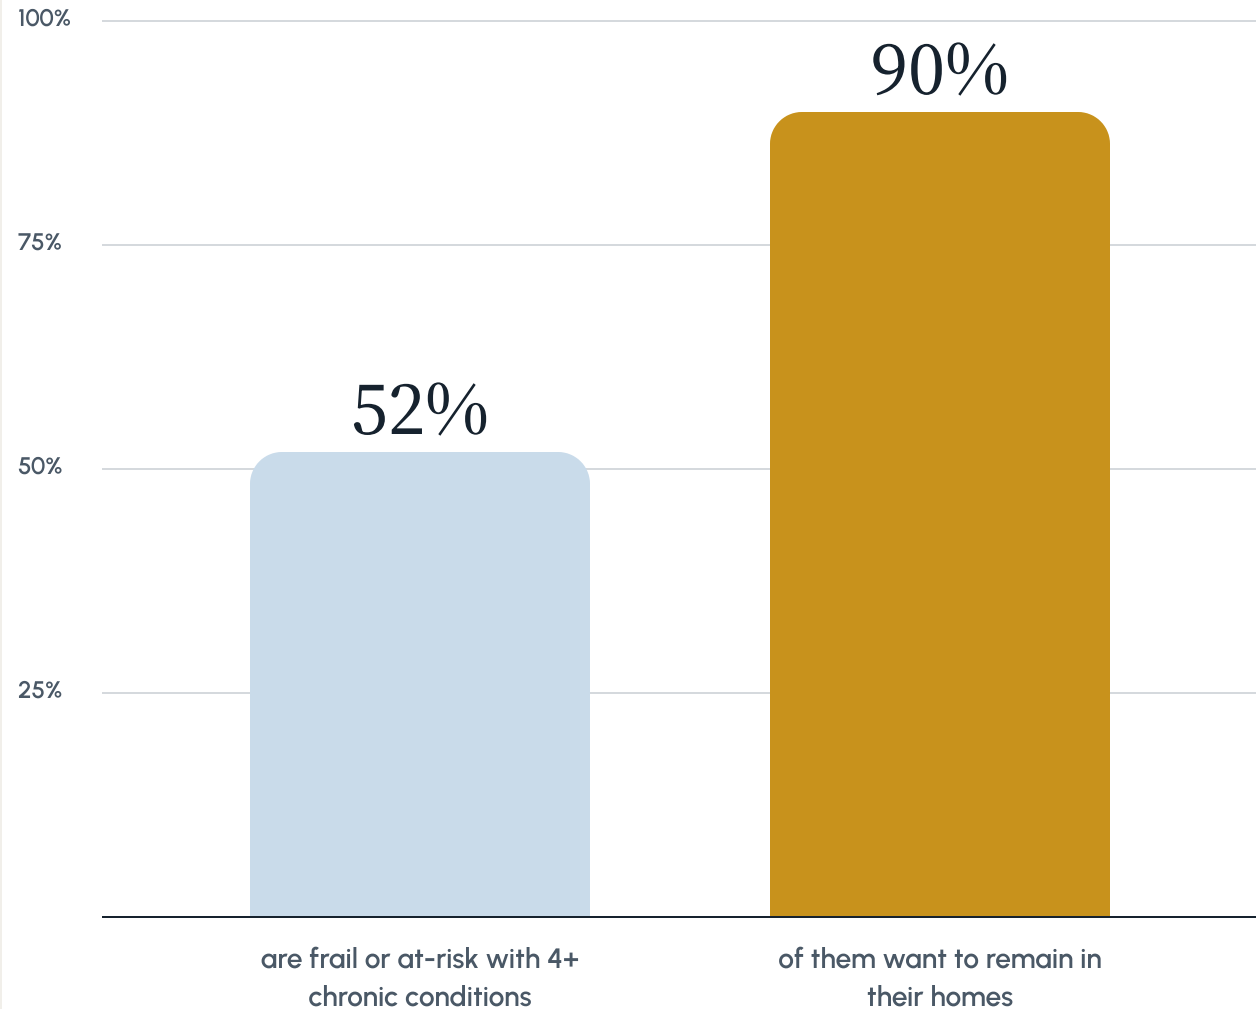

PRODUCTS COMMERCIALIZED
BY OUR TEAM

itracHEALTH is the developer of a holistic digital health platform that helps people with multiple chronic conditions *age in place* — *with independence, dignity and their best possible health.*

itracHEALTH is built
on the foundational
truth that *people
want to age at home*

US seniors: complex health, and a clear wish to stay home

The problem: the aggregate complexity of chronic care is challenging, even for medical professionals.

Why is eNURSE anchored in **medication management**?

50%

% of US patients that do not take medications as prescribed, costing \$200 Billion per year.

>10%

% of hospitalizations caused by medication non-adherence

125,000

Annual US deaths due to medication non-adherence

8,000–10,000

Number of US deaths due to medication errors

\$40 Billion

Annual cost of treating medication errors in the US

Answer: Complex medication management is costly and difficult for seniors to comply with. It is one of the biggest challenges for patients living at home, their family caregivers, home health aides and medical professionals.

Medication management is not pill-dispensing.

Peer-reviewed sources: Osterberg & Blaschke (New England Journal of Medicine, 2005); Viswanathan, Golin & Jones (Annals of Internal Medicine, 2012); Cutler, Fernandez et al. (BMJ Open, 2018); Iuga & McGuire (Risk Management and Healthcare Policy, 2014); Watanabe, McInnis et al. (Annals of Pharmacotherapy, 2018); New England Healthcare Institute (2009).

The increasing complexity of home health care.

Average patient utilization using the eNURSE Personal Health Assistant · interim pilot study results (6 months, in process)

7

different medications taken per day
with the eNURSE Medication
Management System

checkups per day with the eNURSE
App
range 0–5

2,592

annualized pill doses per patient

840

annualized vital-sign checkups per
patient

3,432

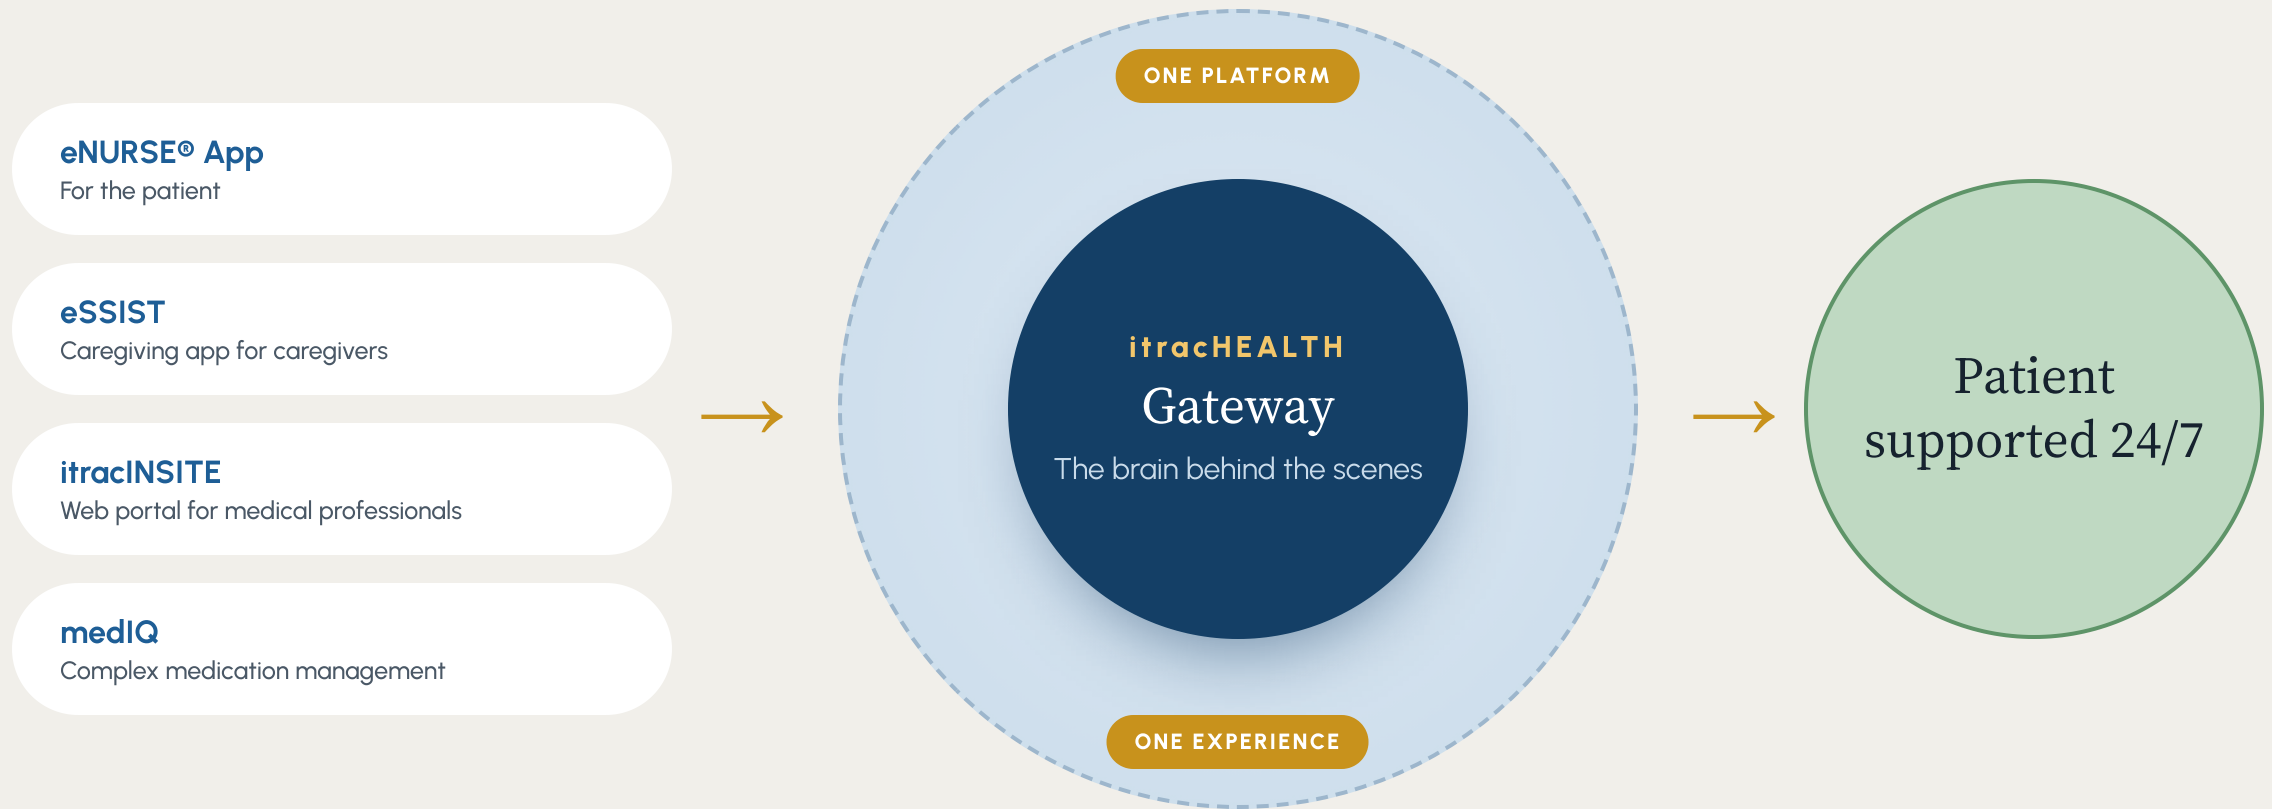

total estimated annual events recorded per
patient

95%

median medication adherence

Can your loved ones handle this complexity by themselves?

itracHEALTH has built **five connected systems** with the patient at the center.

ENURSE® PERSONAL HEALTH ASSISTANT

One device at home. **Eight functions** working together.

Smart Medication Management

40+ features for complex medication management, 24/7.

Remote Vital Signs Monitoring

Wireless, with automated data collection and alerts.

Real-Time Home Health Records

All results, from every device, in one place.

Continuum of Care Apps

Keeps caregivers and medical professionals in sync.

Advanced Scheduling Tools

Appointment and transportation scheduling.

Comprehensive Assessments

Mood, pain and symptoms, checked in on daily.

Socialization

Everyday activities that ease isolation.

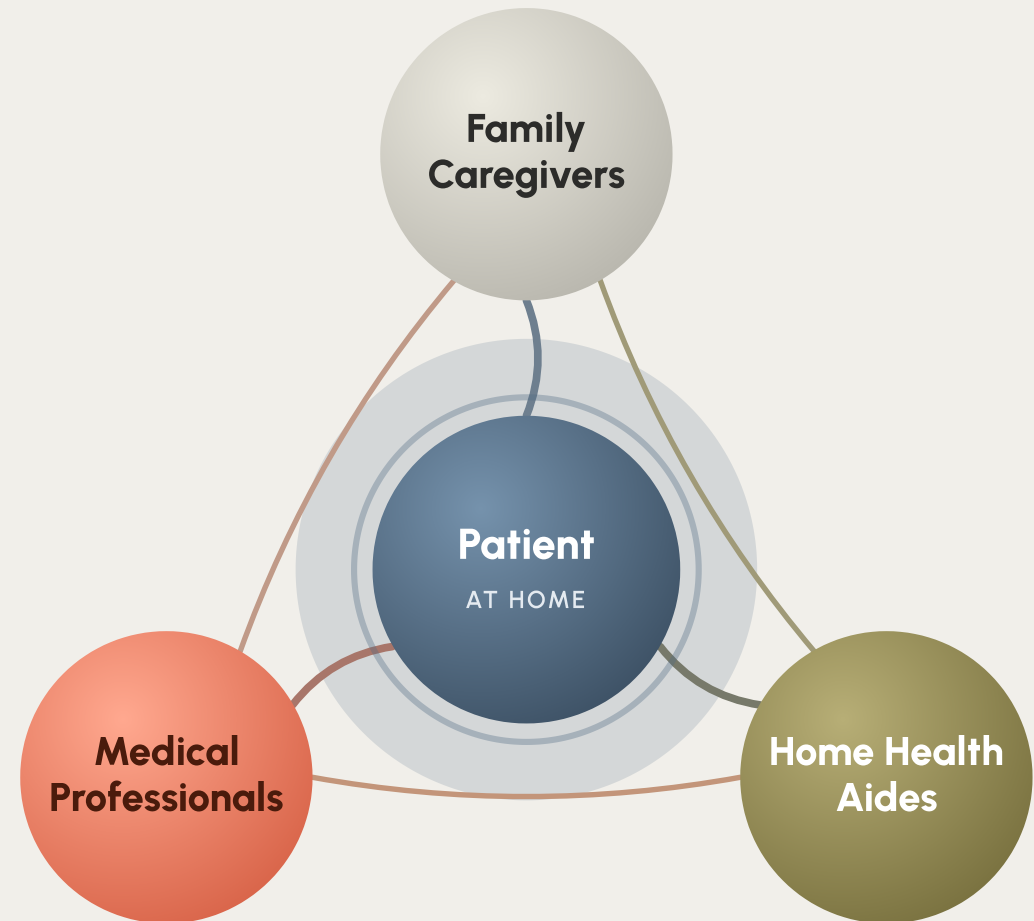

One-Button Telehealth

A single-touch connection to a care provider.

THE TRIANGLE OF CARE SUPPORT

eNURSE creates
a **connected**
community of care.

Patients, family caregivers, home health aides and medical professionals — all working toward the same goal, sharing the same real-time picture.

A new era of care at home.

	The eNURSE® system	Traditional home care
Medications dispensed on schedule, automatically	✓	×
Every dose confirmed and documented in real time	✓	×
Wireless vital signs monitoring with automated alerts	✓	×
One-button telehealth with the care team	✓	×
Family caregivers see status in real time	✓	×
Clinicians get home health records as they happen	✓	×
Support between visits, 24/7	✓	×
Documentation that supports reimbursement claims	✓	×

WHO PAYS

Built for the organizations carrying the cost of care.

itracINSITE supports every reimbursable remote care strategy under Medicare and Medicaid guidelines — and simplifies, documents and supports the claims.

\$20K–\$25K

Cost avoidance range per preventable admission

\$2K–\$3K

Cost avoidance range per preventable ER visit

RPM

Remote patient monitoring

RTM

Remote therapeutic monitoring

CCM

Remote chronic care management

Home care agencies

Personnel efficiency and utilization, better recordkeeping and care coordination, stronger caregiver support.

Health plans & insurers

Fewer preventable hospitalizations and ER visits, less medication waste, higher member satisfaction, better population analytics.

Health systems & physicians

Accurate, timely home-based data for evidence-based remote care, and lower care-delivery costs.

Peer-reviewed sources: Osterberg & Blaschke (New England Journal of Medicine, 2005); Viswanathan, Golin & Jones (Annals of Internal Medicine, 2012); Cutler, Fernandez et al. (BMJ Open, 2018); Iuga & McGuire (Risk Management and Healthcare Policy, 2014); Watanabe, McInnis et al. (Annals of Pharmacotherapy, 2018); New England Healthcare Institute (2009).

One connected care platform. *A growing population to serve.*

Same platform. Same care loop. Every aging population.

Where itracHEALTH is today.

Platform

5 systems

eNURSE, eSSIST, itracINSITE, medIQ and the Gateway — built and connected.

Device

eNURSE®

Investigational device, designed to meet FDA clearance requirements.

Team

50+

Novel medical products developed and commercialized by our team globally.

Reimbursement

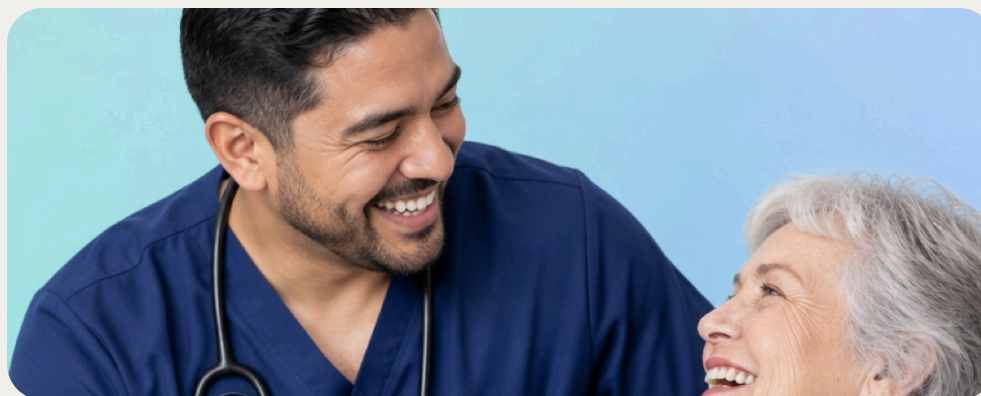

RPM · RTM · CCM

Supports every reimbursable remote care strategy.

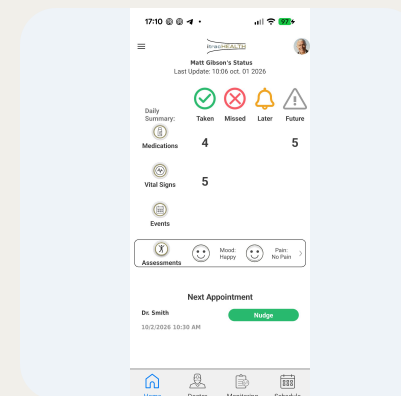

Detailed pilot data, regulatory milestones and financials are shared with qualified investors under NDA.

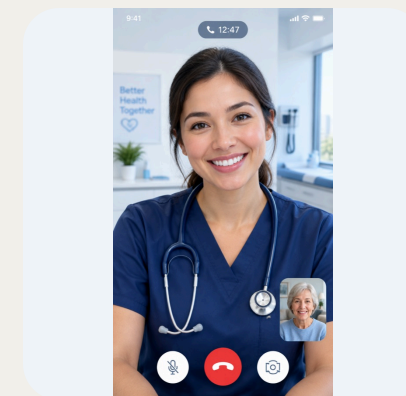

The eNURSE® at home

Home health nurse visit

eSSIST caregiver app

Telehealth with a nurse

A leadership team with a track record in medical products.
